

SUSTAINABILITY LAB

The Sustainability Lab stands for the promotion of competencies and awareness in the sense of education for sustainable development through innovative teaching, actions, excursions and the development of projects related to the topic of sustainability. The Sustainability Lab uses the synergies between projects and regional as well as supra-regional network partners to creatively address innovative issues related to sustainability and the Sustainable Development Goals (SDGs). The Sustainability Lab is open to all professors, employees and students for project work, teaching and final theses.

WHAT DOES THE SUSTAINABILITY LAB OFFER ON SITE AT ECRI??

- BikeStation in cooperation with RESP e.V.
- Laser (product prototyping, model making)
- Screen printing station
