HOW TO USE THIS GUIDE

This symbol shows which companies will check students' job applications.

This stamp shows which companies offer cooperate studies, also known as combined dual studies.

This tick shows which companies offer training or work experience abroad.

MESSAGE

FROM THE VICE PRESIDENT

It is our great pleasure to welcome you today to the fourth job fair at the European Campus Rottal - Inn. After a break of four years due to the pandemic, today is again a day of getting to know each other and networking.

We believe that in addition to an excellent academic education in the lecture halls, gaining practical experience in a working environment is also part of an excellent study program. The aim of the annual European Campus Job Fair is therefore to create an attractive platform for employers and students to network and make valuable personal contacts. This year, twenty companies have accepted this invitation and are presenting themselves here today at the Job Fair. Students can showcase their skills and find out about available internship and graduate positions, while companies can see suitable potential employees with academic training in their respective fields.

I would like to thank the Career Service of the Deggendorf Institute of Technology, the student association First Contact e.V. as well as the Wirtschaftsförderung Rottal - Inn for the effort and work they put into planning the job fair. I would also like to thank all the exhibitors who are committed to supporting young people in their first steps into professional life.

Prof. Waldemar Berg, Vice President DIT

WELCOME

FROM FIRST CONTACT

Dear Exhibitors,
Dear Prof. Dr. Sperber,
Dear mayor Beißmann,
Dear Professors and Students,

the high number of visitors of the firstcontact job fair in Deggendorf the last couple of years shows, that job fairs are becoming increasingly more popular.

We are proud of this demand as it shows that companies believe in our concept.

Furthermore we can proudly say, that the European Campus was able to recruit 20 companies for its own firstcontact job fair.

As a result of the students' fantastic education, they have the potential to become competent and motivated highly-skilled employees with great social skills.

Apart from specialized knowledge, it is also important to leave a positive first impression whilst talking to the representatives of a company. The Career Service offers various seminars that will teach you how to leave a positive impression along with your written application.

Our aim as the student association First Contact e.V. is to offer European Campus students the opportunity to get in touch with company representatives from a wide range of industries about study theses, internships and career opportunities.

Furthermore, we hope that professors make contact with different companies and create joint

projects with DIT. This ensures that students gain insight into the working life during their studies. We would like to thank all our members for their trust in our team.

We would like to thank the Career Service and DIT for their participation and we are proud that together we have made this job fair possible.

Finally, I would also like to thank the First Contact Team, the staff members of DIT and the European Campus, and President Prof. Dr. Sperber.

A particular thank you goes to the Career Service for the fantastic planning of the 4th job fair.

On behalf of First Contact e. V., I wish you a successful job fair and many successful conversations.

Milena Bauer
Chairwoman First Contact e.V.

CAREER SERVICE ADVICE & SUPPORT

Prepare for life beyond university by seeking guidance from your Careers Advisors as well as attending university workshops and seminars about job applications, interview techniques, internships, and much more.

WE WILL HELP YOU TO PREPARE FOR YOUR CAREER

Pfarrkirchen, 08 November 2023

Application as electrical engineer, your offer on the DIT job platform

Dear Mr./Ms. Eckinger,

research the contact person

Thank you very much for the informative and friendly talk at the Job fair European Campus in Pfarrkirchen on 08 November 2023. This once more encouraged me to apply as an electrical engineer with knowledge in developing and controlling in automotive electronics.

Try to write an interesting introduction without empty phrases

I am currently writing my bachelor thesis about "Conceptualizing and developing control devices in cars". I have already gained theoretical knowledge at Deggendorf Institute of Technology in the technical electronics major, which is about automotive electronics and their programming. Before my studies, I worked as an electronics engineer for two years. Self-reliant project work was a crucial part of my tasks. Therefore, I am used to structured and target-oriented work. During my internship at Auto AG, I worked with technology and administration specialists and was able to gain experience in multi-functional teams.

Body:
What experience and professional skills can you contribute? Try to give examples that proof your soft skills. Try to address the demands in the job offer.

In the course Control Units in Cars, I was able to proof successfully my analytical skills. The course aim was to research the function of control units and program them for certain tasks. I particularly enjoyed analyzing complex problems and finding a solution.

At the "Bewerbertraining" seminar at Deggendorf Institute of Technology, I was able to gain first positive insights into your industry-leading company.

I would like to support your company by January 2024.

I am looking forward to an invitation for an interview.

Complimentary close

Relation between you and the company.
Motivation for application.
Possible date for you to start.

Yours sincerely
